

Kalamazoo Astronomical Society
presents

Comet Hale-Bopp Watch

March 28 - April 6

Every clear night at the Kalamazoo Nature Center

Join the membership of the Kalamazoo Astronomical Society as we celebrate the long awaited arrival of Comet Hale-Bopp. Discovered in July 1995 this visitor from the outer reaches of the Solar System promises put on a spectacular show for millions of observers. Members of the KAS will have telescopes and binoculars of all shapes and sizes so you can get the best view possible. When Hale-Bopp completes its tour of the inner Solar System it won't return for 4200 years, so don't let this once in a lifetime chance pass you by. For more information contact the Kalamazoo Nature Center at 381-1574 or visit KAS Online.
